

Know Life Safety and Health Care Facility Codes

Thursday, March 19, 2020

Time: 9:00 am-3:00 pm

(Registration begins at 8:30 am)

Radisson Airport Hotel, 2081 Post Road, Warwick, RI

Presented by Kenneth Daily, Founder, Elder Care Systems Group

CMS adopted both the 2012 Life Safety and Healthcare Facilities Code more than a 3-years ago establishing many new expectations for inspection, testing and maintenance for the many features of fire protection found in long term care facilities. With this sweeping adoption there has been an evident tightening of the requirements through stricter implementation resulting in many more deficiencies for nursing facilities. The Life Safety Code establishes minimum criteria for the many protective features and systems as fire protection, generators, doors, building services, and maintenance activities. All of this must be accomplished under the rubric that facilities achieve an acceptable degree of safety for all who live and work in our centers.

The program will examine all sections of the LSC applicable to skilled nursing and provide forms, policies and best practice guides for use by healthcare organizations; presented by Kenneth Daily, LNHA, Life Safety Specialist. Using real life examples and survey scenarios, you will explore how these codes apply to nursing facilities, discuss code changes and the increased inspection, testing and maintenance (ITM) requirements, and review common violations.

Learning Objectives

- Discuss 2012 edition of NFPA 101 Life Safety Code and the 2012 edition of the Healthcare Facilities Code
- Review the leading CMS Life Safety deficiencies and offer proactive and practical solutions to achieve and maintain compliance.
- Recommend policies, standards and/or guidelines for immediate review and facility implementation.

The RI State Fire Marshal will be on hand for questions
